

- Specifically designed for fibrous applications
- Wide pleat spacing and absence of outer liner permit thorough pulse cleaning
- Proprietary media blend of synthetic and glass fibers reduces pressure drop and increases airflow
- MERV* 12 filtration efficiency rating per ASHRAE 52.2-2007
- Very good chemical tolerance

APPLICATIONS

- Specifically designed for fibrous dusts of $>10\ \mu\text{m}$ particulate
- Applications include:
 - woodworking
 - grain handling
 - composite grinding
 - textiles
 - fiberglass

SPECIFICATIONS

MEDIA COMPOSITION	
Substrate	Proprietary blend of synthetic and glass fibers with an average diameter of 12.0 µm
CARTRIDGE CONSTRUCTION	
Standard Construction	Galvanized expanded metal liner 60% open area Optional stainless steel liner and end caps Urethane gasket Galvanized metal end caps No outer liner
Options	Stainless steel liner and caps

MEDIA COMPATIBILITY DATA	
Temperature Resistance	180°F / 82°C
Moisture Absorption**	Maximum 0.5% @ 70°F (21°C) and 65% RH
Chemical Tolerance***	Acids→Good Oxidants→Fair Bases→Good Solvents→Good
Abrasion Resistance	Good per TAPPI 476 (Taber Method)

MEDIA EFFICIENCY	
U.S. Efficiency Rating	MERV* 12 per ASHRAE 52.2-2007

CONFIGURATIONS

* The Minimum Efficiency Reporting Value (MERV) of this filter cartridge has been determined through independent laboratory testing using ASHRAE 52.2 (2007) test standards. The MERV rating was determined at a face velocity of 118 feet per minute (36.0 meters per minute) and loading up to four inches (101.6 millimeters) water gauge. Actual efficiency of any filter cartridge will vary according to the specific application parameters. Dust concentration, airflow, particle characteristics, and pulse cleaning methods all affect filtration efficiency.

** Environmental conditions involving combinations of high temperature, corrosive material, and moisture can reduce media strength. Reduction in media strength may compromise cartridge integrity and performance.

*** A combination of chemicals may alter fiber resistance to the specified performance level. Chemical attack may compromise cartridge integrity and performance.

Significantly improve the performance of your collector with genuine Donaldson Torit replacement filters and parts.

Important Notice

Many factors beyond the control of Donaldson can affect the use and performance of Donaldson products in a particular application, including the conditions under which the product is used. Since these factors are uniquely within the user's knowledge and control, it is essential the user evaluate the products to determine whether the product is fit for the particular purpose and suitable for the user's application. All products, product specifications, availability and data are subject to change without notice, and may vary by region or country.
